## *Armorik, whisky Breton single malt*

« Distillerie Warengem is home to the very first Breton Single Malt Whisky: Armorik. Established on the northern coast of Brittany, in France, the distillery is independent and family-owned for over a century.

Built in 1900 to produce the finest liqueurs, this craft distillery shows more than 100 years of experience and know-how. In 1983, thanks to Gilles Leizour's passion for innovation and whisky, the distillery became the first French whisky distillery. »

**DAVID ROUSSIER, General manager**

## *Craftmanship*

As a craft distillery, quality is our main concern. We want to keep a careful eye throughout the whisky making process. Armorik is thus brewed, fermented, distilled, matured and bottled at the distillery.

**WATER:** Rest Avel source, 100 meters deep, under the distillery.

**CEREALS:** French barley for the single malts. Breton wheat. Non-GMO.

**DISTILLATION:** Double distillation in copper pot stills. 150 000 LAP/Year.

**MATURATION:** Primarily ex-bourbon and sherry oloroso casks. Our commitment towards our Breton roots can be seen through the partnership which we have with the last Breton cooper. Thus, we use unique Breton oak casks from the local forests of Brittany.

**CLIMATE:** Oceanic climate with mild temperature, humidity, wind and sea spray.

Armorik is not chill-filtered and without added caramel to preserve its authenticity and aromas.

## CLASSIC

46%

**MATURATION:** Matured in bourbon casks

**NOSE:** Intense and complex. Spicy cereals are followed by exotic fruits notes (mango, passion fruit)

**PALATE:** Smooth and rich. Elegant salty notes come along the unctuousity and depth of the whisky

**FINISH:** very long, warm and spicy

*Armorik Classic is mainly matured in ex-bourbon casks of different ages to highlight the richness and smoothness of our distillate. It shows the quality of maturation under the Breton climate and the expertise of our master blender.*
