

SPECIAL WOOD SERIES FRENCH OAK

A perfect balance of sweetness, delicate smoke and light spice from hand-selected French oak casks.

PRODUCT STORY

The Special Wood Series honours the provenance of the different types of oak we've used to mature our single malts since 1810. Like our people, each Oak reflects its origins and has its own story to tell. The Quercus Robur, a long-lived Oak tree, is found primarily in Central France. When crafted into casks, it imparts a subtle spice on the maturing spirit. This is a single malt that tells the story of both our Island and the wood.

CASK INFORMATION

Initially matured in American White Oak ex bourbon barrels, finished in hand-selected French Oak casks to deliver a perfect balance of sweetness, delicate smoke and light spice.

TASTING NOTES

Colour:

Golden satin.

Aroma:

Orchard fruits and fresh flowers.

Taste:

Lime marmalade, caramel latte and vanilla.

0.70L / ABV 42%

BRAND STORY

Welcome to Jura. A few miles off the west coast of Scotland you'll find our island; remote, sometimes wild, yet always beautiful. Home to roughly 212 islanders, one road, one pub, one distillery. Since 1810 this unique island malt has been our greatest endeavour and our greatest reward, it's creation the heart of an unbreakable bond between our island, our people and our whisky.

A UNIQUE ISLAND MALT

OUR COMMUNITY

On Jura, the Gaelic term for the community is **'Diurach'**, which also means **tough**. Diurachs believe anything is possible. After all, there are easier places to make whisky. It's this same spirit that goes into distilling Jura Single Malt Scotch Whisky, giving it qualities like no other.

OUR ISLAND

Scotland may have many islands, but the Isle of Jura is like no other. Home to more than **5,000 deer** and less than **200 islanders**, there is only **one road**, **one pub** and **one distillery**.

OUR WHISKY

Three key elements of our production process allow us to create a sweet and subtly smoky house style of Single Malt Scotch Whisky that is **balanced** and **accessible**.

THE TALL STILLS

Our exceptionally tall stills are some of the tallest in Scotland. We use them to distil a **new make spirit** that is **light, citrus and pine** in character.

THE SUBTLE SMOKE

For less than **4 weeks** each year we distil peated malted barley, which we use sparingly to provide a subtle smoke to all our whiskies.

THE OAK CASKS

These subtle smoky notes are balanced by sweetness from maturation in **American White Oak** ex bourbon barrels.
